President's Message

Dear Members,

It gives me immense pride and satisfaction to present the Annual Report of the Ambad Industries & Manufacturers' Association (AIMA) for the year 2025-26. The year has been one of purposeful action, collaborative growth, and renewed commitment towards strengthening the industrial fraternity of Nashik.

AIMA has always stood as a strong pillar for the industrial team in the city, and this year we further reinforced that role by actively addressing the needs and aspirations of our members. Through focused initiatives in business networking, policy advocacy, skill development, sustainability, and infrastructure enhancement, the Association continued to add tangible value to its stakeholders.

We successfully organized several flagship programs including HR Conclave, Investment Mahakumbh - AIMA Index 2025. business meets including Nashik Business Meet seminars, and industry-government interactions that created meaningful dialogue and opened new avenues for trade and collaboration both domestic and international. Our efforts to promote exports, innovation, women leadership, and environmental responsibility reflected AIMA's progressive vision.

This tenure also marked the development and activation of the AIMA Recreation Center, which now serves as a hub for member engagement, sporting activities, and community bonding. Initiatives such as the EV charging station, installation of the tallest flag post in the premises, water conservation programs, underscores our commitment to sustainable industrial growth.

These achievements would not have been possible without the unwavering support of my team of Office Bearers and executive committee members, past presidents, staff, and, most importantly, our esteemed members. I also extend my sincere gratitude to government authorities, partner organizations, and industry leaders who have consistently supported AIMA's mission.

As we move forward, AIMA remains steadfast in its resolve to empower industries, enhance competitiveness, and contribute meaningfully to the economic development of Nashik and Maharashtra.

I thank you for your trust and continued association with AIMA.

Business Risk Management: The Discipline That Protects What Growth Creates

A ₹50–₹500 crore enterprise does not fail because of weak ambition. It falters when one unplanned event exposes a vulnerability no report ever revealed.

- A sudden promoter incapacity.
- A regulatory freeze on operations.
- A family disagreement entering ownership.
- A key client defaulting.
- A leadership vacuum at a critical moment.

These are not operational issues. They are **business continuity risks**—and they rarely appear on balance sheets.

Consider this reality:

- A profitable manufacturing unit with over ₹70 crore turnover remained partially shut for months after the promoter suffered a medical emergency—simply because single authority, leadership delegation, and ownership protocols were undocumented.
- Orders were ready. Capacity existed. Yet the business paused, not due to market forces, but due to absence of structure.

**Growth is designed.
Continuity is assumed.**

The real question is no longer whether your business is growing—but whether it has a documented plan to survive your absence.
